

Report	Report Page	SQL Table	Change Type	Description
N/A	N/A	DailyLogCount	Deprecation Notice	Table "DailyLogCount" will be removed in the March 2019 release. This table has never been in use and clients should not be referring to it.
	N/A	ChecklistItemObservation	Deprecation Notice	Column "int" will be deprecated March 2019. This column was incorrectly in the data model and has been replaced with the "id" column. In the December 2018 release.
	N/A	Various	Upcoming data type change	The following tables will have their origin_id columns changed to nvarchar(200) from int in the March 2019 release: BudgetModification, ChangeOrderPotentialLineItem, ChangeOrderRequest, PrimeContract, PurchaseOrderContractChangeOrderPackage, PurchaseOrderContractLineItem, TimecardEntry, WorkOrderContract, and WorkOrderContractLineItem. This is a potentially breaking change if you have reports configured that expect the origin_id column to be an integer.
All	N/A	All	Enhancement	Upgraded data types for compatibility with future changes Procore will be making to the API's. Int fields were changed to bigint, numeric were changed to decimal, datetime were changed to datetime2, and nchar & varchar were changed to nvarchar. This was completed on all tables other than "company" and "project". They will be upgraded in a future release.
Core	User Usage	N/A	Enhancement	Added slicer for "Email Domain".
Project Management	Project insights	N/A	Enhancement	Added drill through pages for Inspections, Punch Items, and Observations. Drill-through can be used by right clicking on the related charts and selecting "Drillthrough".
	Project insights	N/A	Bug Fix	"Avg Days to Close" line charts for Punch Items and Observations modified to correctly show values per month.
	Project Vendor Insurance Compliance	N/A	Feature	New report which calculates project level insurance compliance based off of configured values.
	Meetings	N/A	Enhancement	Fixed logic for "Last Meeting" and "Days Since Last Meeting" visuals. Last meeting was showing meetings in the future. "Days Since Last Meeting" will be calculated only on meetings in the past.
	RFIs	N/A	Enhancement	Added new "Posted to Drawings" slicer on report. Using this slicer will filter the RFI results to only show RFI's that do or don't have related drawings.
	N/A	RFI	Enhancement	Added "accepted", "custom_textfield_1_label", "custom_textfield_1_value", "custom_textfield_2_label", "custom_textfield_2_value", "specification_section_id", "specification_section_current_revision_id", "specification_section_description", "specification_section_label", "specification_section_number", "location_created_at", and "location_updated_at" columns.
	N/A	RFIDrawing	Feature	Added new table RFIDrawing to track drawings that are linked to RFI's.
	N/A	CoordinationIssue	Feature	Added new table for "CoordinationIssue". This is related to Procore's new "Coordination Issues" feature set. This is in limited preview. If you would like to have data enabled for this, please contact support@constructionbi.com.
	N/A	CoordinationIssueViewpoint	Feature	Added new table for "CoordinationIssueViewpoint". This is related to Procore's new "Coordination Issues" feature set. This is in limited preview. If you would like to have data enabled for this, please contact support@constructionbi.com.
	N/A	CoordinationIssueLinkedProcoreItem	Feature	Added new tables "CoordinationIssueLinkedProcoreItem". This is related to Procore's new "Coordination Issues" feature set. This is in limited preview. If you would like to have data enabled for this, please contact support@constructionbi.com.
