Report / Area	Report Page	SQL Table	Change Type	Description
N/A	N/A	DrawRequest	Deprecation Notice	Columns "contract_type" and "contract_title" in table "DrawRequest" will no longer be supported in the DrawRequest table due to changes in the Procore API. To get these fields, use a relationship between column "contract_id" in DrawRequest to the "id" fields in "PurchaseOrderContract" and "WorkOrderContract" tables. This change is effective *immediately*. Columns "contract_type" and "contract_title" in the DrawRequest table will be removed in the **May 2019** release.
	N/A	PhotoCategory	Deprecation Notice	Table "PhotoCategories" will be removed in the **May 2019** release. This table has not been in use. The photo category on a given image is found as the "image_category_name" field in the "Photo" table.
	N/A	ChecklistItemObservation	Deprecation Notice	Column "int" will be deprecated in the **May 2019** release. This column was incorrectly in the data model and has been replaced with the "id" column.
	N/A	CompanyUser	Bug Fix	Fixed an issue causing columns "permission_template" and "permission_template_project_specific" to store each other's data.
